COMMENTS ON PROPOSED CHANGES TO 5 MHZ BANDPLAN
SMSE-010-12

1. I am in favor of synchronizing the five additional frequencies with those in the U.S.

2. Emissions and power levels should be the same as in the U.S.

3. I am in agreement with a maximum power level of 100 watts PEP for these frequencies.

4. A domestic channel on 5329 khz would be an advantage especially for emergency operations.

5. The power level should be 100 watts PEP similar to the other channels.
